

## PROPERTIES

The product is a long lasting anti-rust protective coating containing solvents.

It forms a waxy film coating with good mechanical resistance.

It is the appropriate product to use for protecting material that has to be stored for long periods of time, either indoors or out, from rust and oxidation.

Guaranteed protection:

- approximately 4 months outdoors;
- approximately 12 months indoors.

## APPLICATION

It can be applied:

- by immersion;
- by brush;
- by compressed air sprayer.

The waxy coating can be removed using common petroleum solvents.

## USE

To be applied on machine parts, gears, and tools.

Excellent coating ability.

Must be stored in a tightly closed container.

## TECHNICAL CHARACTERISTICS

CHARACTERISTIC	UNIT	VALUE	METHOD
Specific weight at 15°C	Kg/l	0.820-0.850	ASTM D 1298
Flash point	°C	46	

N.B.: The values shown above refer to normal industrial production and do not constitute technical specification; they are approximate and may be subject to variations and improvement.
